IAZOWEDNESDAYEVENING, SEPTEMBER13. A GOLD ISLAND IN THE WEST INDIES.--From the Paterson (N. J.) Guardian, September 5.]-Some three months since a small island in the Caribbean sea, known as the Bimita, and about eight hundred miles south of Trinidad, while being explored under the In the streets among crowds of people is one of direction of Agassiz, was found to contain gold. | the marked sensations produced by the The rock is quartose, and quietly a few individuals obtained possession of the island, and these individuals-all Americans-will not dispose of any interest, although last week several offers from English capitalists in London were received, information having reached them through the Custom-house, as is supposed, although every arrangement had been made to keep the matter as quiet as possible. The gold is free and easily amalgamated, and in purity in veins in the quartz. Forty different veins have been discovered on the island, and five are now being worked, and the ore is being received from ships at the Centreville Works, in Greenville, in Hudson county. The works are running night and day. The ore is now, with very imperfect machinery, yielding sixty dollars per ton, and they are only getting one-third of the gold, but the "tailings" are being saved, with the view of running them through the improved machine being contracted for. All the gold ore seen by our reporter, who tested the specimens just as dumped out on the wharf, will yield \$180 per ton. This great dis-

covery is believed to be likely to build up a very

important enterprise in Hudson county. The ore is as rich as the richest ores of California

and Venezuela.
